

**STATEMENT OF CANDIDATE FOR  
ROSEVILLE JOINT UNION HIGH SCHOOL DISTRICT**

**Matthew G. See**

**Age:** 28

**Occupation:** Government Performance Evaluator

**Education and Qualifications:** As a masters degree graduate in public policy from Pepperdine University, I understand the importance of education. We have a high-quality high school district, but I believe we can continue to raise the bar by enhancing academic requirements, implementing an International Baccalaureate Program, encouraging student community service projects, and fostering strategic alliances with local employers such as Intel or HP.

We must foster an educational environment that is conducive to learning. This environment should address not only academic concerns, but also re-enforce the values that parents instill in their children at home. Family involvement is crucial to our children's education. We need to encourage parents to utilize the recently implemented Aires communication package, which empowers parents to hold their child accountable to a higher level of academic excellence.

Finally, we need to vigilantly ensure the safety of our children from violence and drugs. Each student should feel that they are safe at school and a part of their small campus community. As a trustee, I will work to help students realize their goals and dreams, while encouraging parents to take the lead in the most fundamental institution in society, the family. I appreciate your vote on November 2, 2004.
